SUMMARY

Full-stack developer with 4+ years of coding experience, building and maintaining web applications using React, Next.js, Laravel, and Vue. Experienced with REST APIs, payment integrations, Linux, Docker, and CI/CD, and remote collaboration with international teams. Uses AI tools to support software development.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, PHP, Kotlin

Frameworks, runtimes, and platforms: Node.js, React, Next.js, Laravel, Vue, NestJS, WordPress, Filament

Databases and caching: PostgreSQL, MySQL / MariaDB, MongoDB, Redis

DevOps and Infrastructure: Docker, Linux, GitHub Actions, CI/CD, Cloudflare, WireGuard

Development Tools: Git, GitHub, Vite, Postman, Sentry

AI-ASSISTED DEVELOPMENT

Leverages AI coding agents (Codex, Claude Code, OpenCode) for code generation, refactoring, debugging, code review, and test development. Integrates AI into Git-based workflows to accelerate development while maintaining code quality, architectural consistency, and control over changes.

EXPERIENCE

Full Stack Developer

DigitalDaba | Oct 2024 - Present

- Build and maintain frontend and backend features on MERN and full-stack projects.
- Collaborate on code reviews, bug fixes, and feature delivery using GitHub.
- Develop responsive user interfaces and API integrations.

Full Stack Developer

GreyWeb | Apr 2024 - Oct 2024

- Redesigned a client dashboard using React and Laravel.
- Integrated Pterodactyl and Timeweb Cloud APIs into the Laravel backend.
- Built frontend dashboard views using Vue 3.

Full Stack Developer

Ajicod | Jan 2024 - Apr 2024

- Integrated CMI, PayPal, Stripe, and YouCan Pay gateways into client web applications.
- Developed frontend and backend features with a team using JavaScript and PHP.

EDUCATION

Solicode | Bootcamp | 2024

L'karriere | Bootcamp | 2023

Lycée Youssef Ibn Tachfine | Science Mechanics and Technology | 2022 - 2023

PROJECTS

LinksEventGroup

Next.js, Laravel | Aug 2024 - Present

- Built client and administration areas using Next.js.
- Developed the backend API using Laravel.

Rancy Hotels

WordPress, Laravel, Filament | May 2024 - Jun 2024

- Built the main hotel website using WordPress.
- Developed the booking dashboard using Laravel and Filament.

PaulromHosting

Pterodactyl, Laravel | Jun 2024 - Aug 2024

- Adapted Pterodactyl into a game hosting store with a credit system.
- Built backend logic for credits and hosting services.

PERSONAL PROJECTS

hamzaOS

React, TypeScript, Vite

- Built a Debian 12 KDE-inspired browser interface running entirely on the client side.
- Implemented the interface using React; the repository also uses TypeScript and Vite.

<https://github.com/HamzaJarane/hamzaOS>

Rumble Notifier

JavaScript, Discord webhooks, Docker Compose

- Built a notification service for new Rumble videos and live streams using Discord webhooks.
- Provided Docker Compose deployment instructions.

<https://github.com/HamzaJarane/rumble-notifier>

GameME Discord Bot

JavaScript, GameME API

- Built a Discord bot exposing game server and player information through slash commands.
- Added commands for player profiles, server details, player lists, and paginated rankings.

<https://github.com/HamzaJarane/Gameme-discord-bot>

WalkinCity

Virtual tours | Feb 2024 - Jun 2024

- Developed a virtual walking project allowing users to explore cities online.
